

July 17, 2023 | By Wisner Baum

There is a growing body of research outlining the risks associated with the HPV vaccine, Gardasil, which include (among others):

- Autoimmune disorders
- Chronic fatigue syndromes
- Chronic pain syndromes, including Chronic regional pain syndrome (CRPS)
- Death
- Dysautonomia
- Fibromyalgia
- Guillain-Barré syndrome
- Idiopathic Thrombocytopenic Purpura (ITP)
- Lupus
- Neurological disorders
- Postural orthostatic tachycardia syndrome (POTS)
- Reproductive disorders, including premature ovarian failure (POF) and infertility
- Small fiber neuropathy

If you have suffered from side effects after Gardasil, please contact the HPV vaccine attorneys at Wisner Baum to learn more about your legal rights. We offer free case evaluations
